

Video Editing – Pilot Fall 2010

Course Code: 5220Q

Course Offering: Semester

Course Description

If you enjoy creative thinking, planning for and executing projects that are different, unique, and exciting - this is the course for you! The video-editing class is about learning to use the tools of video-editing to make your original and creative videos. This course teaches you how to film, upload and edit a video. You will learn about working with different files, how to add titles, transitions, music, and much more. The course uses video-editing skills and techniques as a path to learning about Renaissance art. Not only will students learn and understand more about art history and the "Renaissance Brain", these ideas provide a spring board to create new works of art today in fascinating and innovative ways! This course is guaranteed to challenge, inspire, and invigorate what students already know or think they know about the Renaissance, Video-Editing and art!

This course has been created in collaboration with the North Carolina Museum of Art with funding provided by the Wachovia Wells Fargo Grant.

Prerequisites

Successful completion of Art One; please note - the basic skills learned and practiced in Art One are essential to the success of students enrolled in this course.

Required Materials:

- * A DV camcorder.
- * The Firewire cable (IEEE 1394) for transferring the images from the camera to the computer you'll be using.
- * The computer you will be using to access the course, which should have a FireWire port.
- * A flash or jump drive on which you can save your image.
- * Space in a file on your school's server.
- * Access to a video editing program such as: Movie Maker, iMovie, Adobe Premiere Elements 8, Pinnacle Studio, etc. This is something you will need access to every day, not just once in a while.
- *Optional: WEB CAM if you don't have a built in camera on your laptop or computer. You can use this for your video blog if you want.

Video-Editing Software (PC):

1. [Cyberlink PowerDirector](#)
